

ASSM-112R Series is an array of 2-Way Power Splitters mounted on a 2RU Sub-Rack Tray (PN: R112B-2RU). Up to 16x of the Reactive Splitters (Model #: 112R-600-6000-QMA) can be mounted on a rack tray. Each of these splitters has an independent RF path. The Splitters have both Input and Output connectors on the same side which makes connection on a Rack Frame or H-Frame simple and straightforward. They cover all the traditional Cellular frequencies, including the CBRS, C-Bands and LTE-LAA. When mounted on a DAS Tray, they can be used to split signals coming out of Attenuator Modules into different zones in In-Building Systems. It also has a very low Insertion Loss with an outstanding VSWR at all three ports.

Each Assembly includes the following:

- **2RU Sub-Rack (PN: R112B-2RU)** – Holds up to 16x 2-Way Splitter Modules
- **2-Way Power Splitter with QMA Connectors (PN: 112R-600-6000-QMA)**

- Up to 16x 2-Way Splitter Modules on 2RU tray
- Each Splitter has independent RF Path
- Input & Output Connectors along the same side
- INPUT – QMA (F)
OUTPUT – QMA (F)
- **CBRS / C-Band / LTE-LAA** Ready
- Low PIM , -161dBc
- In Stock to low lead time delivery
